DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11-12, 14-15, 18-31 and 34-36, drawn to a method or operating an adaptive interface, classified in class 370, subclass 465.
 - II. Claims 4,7-8, 16-17 and 32-33 drawn to a method of providing traffic recovery in a transport network, classified in class 370, subclass 230.
2. The inventions are distinct, each from the other because:

Inventions I and II are related as combinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant cases, invention I has separate utility such as operating an adaptive rate interface connected between a data terminal and an optical communication network an invention II also has separate utility such as providing traffic recovery in a transport network comprising allocating bandwidth to traffic for transmission over a working route of the data pipe. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2665

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
